SECURITY SOLUTIONS

VAPT Software Solution:

VAPT is a term used to describe security testing that is designed to identify and help address cyber security vulnerabilities. VAPT could include anything from automated vulnerability assessments to human-led penetration testing and red team operations.

DDoS Attack Solution:

A distributed-denial-of-service, or DDoS, attack is the bombardment of simultaneous data requests to a central server. The attacker generates these requests from multiple compromised systems.

Secure VPN Solution:

A virtual private network (VPN) provides privacy, anonymity and security to users by creating a private network connection across a public network connection. VPNs can be used in combination with proxy servers, and overlay networks.

Cyber security Solution:

Cybersecurity is the protection of internet-connected systems such as hardware, software and data from cyber threats. The practice is used by individuals and enterprises to protect against unauthorized access to data centers and other computerized systems.

MESSAGE

This brochure is created to give you a better idea of who we are and where we will go. It is also intended to give you a better understanding of our approach and our vision for the future. The Internet has created a seamless network with no geographic boundaries. Human struggle has been easier to find out anything because of the invention of Internet. But there remained one boundary and that is language. We are able to tackle the last boundary as a multi-language web site has been developed. So whether your project is Internet based or of a more traditional means, let us assist you in creating you with truly no boundaries. Your complete satisfaction is our goal without sacrificing quality or time.

SIMEC is an Internet based IT consulting organization, whose primary focus is to provide high quality software development & Information Processing Services for the ever changing and growing industry. We do provide proper training by experienced and skilled trainer to implement our services successfully. SIMEC looks forward to developing new and innovative ways of improving client and customer service through the introduction of new technologies and procedures. To make our efforts successful we must appreciate all kinds of co-operation and support from the valuable customers and clients.

Engr. Sardar Md. Shaheen
